## MORE GOLDENSEAL FEATURES

**Bank Accounts**— Automatic reconciling against bank statements. Handles multiple checkbooks. Prints checks and paychecks.

**Billing**— Flexible time and materials tracking and billing rates for equipment, labor and subs. Specialized project billing (draw schedules, progress payments, time and materials, change orders).

**Data Access**— Excellent Find and Sort commands make it easy to locate any record or group of records.

**Equipment**— Tracks equipment use and expenses.

**Import and Export**— Very easy to get data into or out of Goldenseal (via text file import/export).

**Job Costs**— Job costs by category and subcategory or cost location (e.g. by room). Supports multiple cost category systems. Flexible job cost rates for equipment, labor and subcontractors. Labor costs automatically include payroll costs (burden).

**Payroll**— Annual tax table updates are available as a free download. Handles multiple wage rates, insurance rates based on work categories, benefit payments and deductions. Tracks vacations, comp time and payroll taxes due to each tax agency.

**Printed Forms**— Custom forms for checks, estimates, envelopes, mailing labels, reports & more.

**Purchase Orders and Work Orders**— Provides warnings for purchases over purchase order amount.

**Retainage**— Tracks project retainage.

**Sales Tax**— Automatic computation of sales tax amounts for both purchases and sales. Handles GST, PST and VAT taxes and vendor withholding.

**Security**— Includes customizable password access to different areas in the program. Audit Trail records show each record change.

**Subcontractors**— Provides warnings for subcontractors with expired insurance.

**Subcontractor Bids**— Tracks competitive bids. Warns about overpayment of bid amounts.

**Templates**— Template transactions allow quick creation of repeat transactions.

**Unit Costs**— Includes detailed cost items and assemblies. Flexible markups and waste factors. Prices update automatically from purchases.

## TECHNICAL SPECS

Maximum number of accounts or transactions in any class: 2 billion.

Maximum dollar amount: \$2 billion. Supports foreign currencies.

Programming language: Codewarrior C++, using object-oriented programming (OOP).

Records are stored in an efficient object database.

# GOLDENSEAL FAQ's

## ***How much does it cost?***

Goldenseal costs \$795 for the full version, or \$495 without accounting. The multi-user version is \$995 for two users, \$1395 for five users, \$1795 for up to 10 users, and \$2695 for up to 20 users.

## ***What hardware do I need to run it?***

Goldenseal runs on any **PC** with Windows 98 or newer (including NT, 2000, ME and XP). It also runs on any **Macintosh** with System 8.6 or newer.

The data entry forms and reports just barely fit on a 13" to 15" monitor (640 x 480 pixels). Smaller than that, and you'll need to customize the forms or do a lot of scrolling.

## ***Is it easy to learn?***

Yes. Goldenseal uses 'real world' accounts and 'real world' business forms that you are already familiar with. We have some good human interface designers who have done their darnedest to make it easy. And our programmers do phone support, so they soon hear about anything that isn't easy.

## ***Will it work for my specific business?***

Probably. Goldenseal includes several different 'starter files' for different types of businesses.

You can also customize any part of Goldenseal to meet your needs. It is easy to add more unit costs, change the cost categories, change any reports or printed forms, and add custom fields. You can even change the appearance of any data entry screens.

If you have specific requirements, give us a call and we'll give you an honest appraisal of whether Goldenseal will work for you.

## ***Can you run Goldenseal on a network?***

Yes, Goldenseal comes in a multi-user version. It is a client-server application that you can access over a LAN (local area network) such as Ethernet. You can also dial-in with a modem.

## ***Who is Turtle Creek Software?***

We started out as Turtle Creek Carpentry in 1972, and wrote our first accounting program (MacNail) in 1986. Since then we have sold our estimating and accounting software to over 7,000 small businesses. We know what we are doing!

## ***What's the manual like?***

Goldenseal includes two printed Getting Started manuals that walks you through the entire program, step-by-step. They show the basic Goldenseal features, then explain how to set it up for your own company. There is also a more detailed reference manual on the CD. All manuals are also available on our website at [www.turtlesoft.com](http://www.turtlesoft.com).

## ***What kind of support will I get?***

Besides the manual, you'll get unlimited free telephone or email support. When you call Turtle Creek you get to talk with a real live person right away. We do our darnedest to solve any problems you might have. Classes are also available each year.

## ***How does Goldenseal compare to Quickbooks?***

You don't need to hire an accountant to set up Goldenseal. It automatically handles allowances, change orders, competitive bids, inventory, progress payments, retainage, subcontractor insurance, unit costs and many other small business quirks.

Goldenseal includes a translator that lets you import your Quickbooks accounts and lists automatically.

## ***What about upgrades?***

Goldenseal is solidly built inside—it will be our 'flagship' program for the next ten years. We are adding many more features to it, and release major upgrades about twice a year.

When you purchase Goldenseal, you'll get six months of free updates via our download system. After that they are available at a reasonable cost.

## ***Can I return it if I don't like it?***

Yes. If you don't like Goldenseal, get it back to us within 30 days of the order date, and we'll refund the purchase price, less 10% restocking.

## ***Is there a demo I can try?***

Yes. The demo is the full Goldenseal program, with a limit of 50 items in each type of account and business transaction.

You can download the demo and manuals for free from our website, or we will mail you a CD for \$5 (manual on CD) or \$45 (with printed manuals). The cost of the demo is deductible from any purchase.

Current Payroll

## Reports

Goldenseal includes a wide variety of reports (the one at left shows labor hours grouped by job). They help you to get the most from the data that you've entered.

Double-click on a row, and Goldenseal will open the transaction for you, so you can see more details about it.

All reports can be customized, and you can create new custom reports (see the next section).

## Payroll

To calculate payroll, choose Write Payroll from the Costs menu.

Goldenseal automatically figures employer taxes and withholding. We include data for all US states and Canadian provinces at no additional charge.

## Custom Forms

Goldenseal includes a Custom Layouts command which lets you change the appearance of any data entry window, printed form or report.

It takes you to a simple drawing environment where you can move things around, add or remove fields, or paste in graphics of any kind.

You can add custom data fields to any account or transaction. You can also create new printed forms and reports, if the ones we provide don't meet your needs.

### Job Costs

Goldenseal's Job Cost command shows your expenses for each project, with a simple cost breakdown for each. Double-click on a row for more detail.

You can see costs by category, by room, or by individual item. You can also view a progress window (shown at left) that predicts the final cost.

Goldenseal also includes 'estimated vs actual' reports so you can see how well each estimate has done compared to the original budget..

### Billing

Goldenseal handles customer billing and several types of project billing—for draw schedules, progress payments, time-and-materials bills, allowances and change orders.

Choose Billing from the Income menu, and choose the billing type. You'll see a list of customers or projects that are ready to bill. Double-click on a row to see details (shown at right). Click the Create Bills button to write a bill. You're done!

### Management Tools

Goldenseal tracks appointments, calls, contracts, documents, problems and prospective customers.

It handles bids, chargebacks, purchase orders and sales.

Property managers can use it for leases, rental income and rental expenses.

Once you have entered records, the Find command makes it very easy to locate what you need.

## Paying Bills

After you've entered expenses, choose Pay Bills from the Costs menu.

It will show you a 'quick report' of vendors, and the amount that you owe each of them.

Double-click on a vendor to see the specific items. Click Create Checks, and Goldenseal will create payments for the selected items.

## Estimates

Goldenseal creates fast and accurate estimates.

It includes unit costs for many types of businesses, with labor hours and material quantities built in.

With Goldenseal 'smart dimensions', you can enter a few measurements, and see net quantities automatically for each item in the project.

Goldenseal also lets you include allowances, competitive bids and several types of markup in an estimate.

Once you finish, Goldenseal gives you a simple schedule, a bill of materials, and detailed contracts or spec sheets.

# GOLDENSEAL FEATURES

The Project Accounts window displays a 'Project Account' for 'Peach repairs T&M'. Key fields include Customer Type (Customer), Customer (Mike 'The Peach'), Estimate (Peach repairs T&M), Project Name (Peach repairs T&M), Billing Name (Mike Pychywyczk), Address (Shady Grove Cemetery 114 Tranquility Lane), Telephone (none), Contract Amount (\$4,440.00), Sales Tax Rate (Cortland- non City \$355.20), Total Amount (\$4,795.20), and Comments. Buttons for 'View Appointments', 'View Document Log', 'View Contact Log', 'View Problem Log', 'View Project Log', 'View Billing Records', 'View Equipment Hours', 'View Labor Hours', 'View Material Costs', 'View Subcontract Costs', 'View Other Costs', and 'View Change Orders' are available. A 'More Info' button is also present.

## Basic Accounts

Goldenseal uses 'real world' accounts that match the way you do business. They'll help you to keep track of your customers, vendors, bank accounts and other business details.

For example, create a Project account for each job you are doing (see example at left). The data entry window lets you fill in key information about the project. Click the buttons to see project expenses, appointments, problems and other details.

**HINT:** you don't need to create 'accounting' accounts for things like Accounts Payable, because Goldenseal already includes them.

## Expense Tracking

Goldenseal makes it easy to enter your expenses—equipment hours, labor hours, material purchases, subcontractor costs and other costs.

When you enter a cost, Goldenseal automatically includes the item in job costs, time and materials billing and Accounts Payable.

The Material Purchases window shows a purchase for '50 ceramic fruit flies'. Fields include Supplier (Bishops of Ithaca), Date (9/12/2000), Job Class (Project), Job (Joe Apple- Kitchen Drs), Breakdown (None), Status (Entered), Transaction (backsplash fruitflies), Pmt Method (Vendor Invoice), and Details (Net 30 Due 25th). Other fields include Brief Description (50 ceramic fruit flies), Gross Price (\$118.27), Tax Rate (Tompkins County \$9.46), Net Price (\$127.73), and Comments (factory back-order due to "unusually high demand this year"). A 'More Info' button is present.

## Job Type

### Easy Data Entry

Goldenseal uses 'clairvoyant' fields for faster data entry. Type in the first few letters of the item's name, and the complete name will appear in a convenient list. Or click on the button to see a pop-up list of all items.

You can also set up templates for items you use frequently, or recurring items that you want Goldenseal to add on a regular schedule.

## Easy Data Access

It's easy to find records. Choose Find from the Edit menu, enter what you remember about the transaction, and Goldenseal will quickly locate it for you.

It's even easier to locate 'linked' items such as the check used to pay for an expense. Choose Payment Transaction from the View menu, and you'll see it.

# GOLDENSEAL™

Integrated construction estimating, job cost accounting and project management for Macintosh and Windows

## WHAT DOES IT Do?

Goldenseal is an integrated construction management program that includes:

- Accounting
- Estimating
- Project Management

It also handles all of the following:

- Accounts Payable
- Accounts Receivable
- Bids from Subs and Suppliers
- Customer and Prospect Tracking
- Check Printing
- Contract Writing and Spec Writing
- Custom Business Forms and Reports
- Inventory
- Material Takeoffs/Bills of Materials
- Payroll
- Project Billing (draws, progress, time & mat'l)
- Project Schedules

## WHO CAN USE IT?

Goldenseal is designed for any small business that needs to track job costs, provide estimates, or do billing for projects or services. It works for:

- Remodelers
- Home Builders and General Contractors
- Architects and Designers
- Painters
- Framing and Drywall subcontractors
- Developers and Property Managers
- Other construction trades

## WHAT'S GOOD ABOUT IT?

**Goldenseal is 'builder friendly'.** It's designed for companies that need management tools, but don't have time to learn classic accounting.

**Goldenseal does more than just accounting.** It also creates estimates, manages projects, and handles prospects, phone calls, paperwork and many other details of your business.

**Goldenseal is great at estimates and cost tracking.** It itemizes costs by category or location. It includes a 'price book' of items and assemblies for estimates, inventory, purchases and sales.

**Goldenseal is fully integrated.** Enter expenses once, and they'll show up instantly in accounts payable, job costing and time and materials billing. Material purchases automatically update your unit prices.

**Goldenseal is friendly.** We are experts at human interface design, and we've spent ten years making sure that it's easy to use.

## WHAT DOES IT Cost?

### Goldenseal Basic

- Estimates, material takeoffs, schedules, contracts and project management.
- **\$395**

### Goldenseal Complete

- All estimating features, plus accounting, job costs, payroll and project billing.
- **\$695**

### Goldenseal Multi-User

- 2 to 20 users can share it over a network.
- **\$895 to \$2195**
